1,000 drivers 100 cars 10 countries

L3Pilot is the first large-scale comprehensive pilot test of automated driving functions of SAE Level 3 and 4 on public roads across Europe. All major European automotive manufacturers, suppliers and research institutions have joined forces to prepare a testing environment for large-scale field tests in series cars following the L3Pilot project.

The technologies being tested cover a wide range of driving situations, including parking, overtaking on highways, and driving through urban intersections. These tests will provide valuable data for evaluating the technical aspects and overall impact of automated driving on traffic and society. L3Pilot is particularly concerned with user's perspectives on automated driving, studying user acceptance and their driving and travel behaviours. L3Pilot partners will define a set of rules for system engineering and safety validation of automated systems, captured in a Code of Practice for Automated Driving.

Duration: 48 months, September 2017 – October 2021 **Budget:** €68 million **Coordinator:** Aria Etemad, Volkswagen Group Innovation **Funding and support:** Co-funded by the European Union under the Horizon 2020 research and innovation programme under grant agreement No 723051 with €36 million. Supported by the European Council for Automotive R&D (EUCAR). **Consortium:** L3Pilot unites 34 partners: OEMs, suppliers, research, SMEs, insurers, one authority and one user group.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 723051.

Supported by the European Council for Automotive R&D.
